to De

De Villo,

I am just now reading your review of Femmeglitch Fatale by Kristine Snodgrass.

<http://asemicfront2.blogspot.com/2021/02/femmeglitch-fatale-asemic-front-2.html>

It makes me happy to see work developed under the umbrella of "asemic writing" circling back towards its origins in content-driven text/image poetry. This is important work, a textbook for teaching the true arc of our complexly current moment in the asemic movement. The personal is political and the political is polysemic.

As Snodgrass writes, "The glitch reimagines the language, dissecting it and rearranging it in the spirit of asemics. Or pansemic. Or abstract." Or, precisely, all of the above. This approach identifies asemic writing as one component among many in the ever-expanding constellation of experimental/innovative/difficult/restless poetics. It is a welcome extension of the field. It may be difficult to find "news that stays news" in the field of asemic writing, but this looks to me like exactly that rarity, which is exactly what we need in our ongoing quest for clarity in this context.
